

## **WIND AND HAIL UPDATE**

*South Carolina Wind And Hail  
Underwriting Association  
P. O. Box 407  
Columbia, SC 29202*

February 4, 2008  
08-01

---

### **MANUFACTURED HOMES Pier Requirements**

In response to data provided by a specialist in the manufactured homes arena, the Association is making an adjustment to its pier requirements for manufactured homes.

The Association has required the pier system to include a four inch concrete cap. The cap must cover the entire top layer of the pier.

**Effective immediately, the Association will accept caps made of treated wood. The caps must still be four inches thick and cover the entire top layer of the pier.**

If you have any questions about the rule change, please contact one of the Association's underwriters.

### **SURPLUS LINES BROKER PREMIUM TAX**

**You do NOT have to file a premium tax form with the Municipal Association of South Carolina or a Yearly Broker Tax form from the South Carolina Department of Insurance *for business placed with SC Wind.***

For further information, please see Bulletin 07-16.
